

Consensus and Next steps for Proposed Age CDE

- ▶ 1. we should write an algorithm for computing age. Compare year, months, days
- ▶ 2. perhaps we should add a units variable [NO]
- ▶ 3. people may be fine with having a derived reported age in years, but we will share only the dates, unless they only report the age.
- ▶ 4. Person reported age, (derived event) reported age. These are the two common data elements we agreed on having.
- ▶ We have edited the age document
